Operációs rendszerek BSc

5.gyak. 2022. 03.07

Készítette:

Szabó Alen Bsc Progterv. info. MX6WLR

Miskolc, 2022

1.Feladat rendszerhívások:

```
#include <stdio.h>
#include <stdlib.h>

int main()

{
    printf("Rendszerhivasok tesztelese.");
    printf("Billentyu lenyomasig itt maradunk.");
    system("pause");
    printf("Megtortent a bill lenyomasa.");
    system("random");
    printf("A random parancs nem lesz ervenyes.");
    system("pause");
    system("cls");
    printf("Letisztitottuk a feluletet.");
    return 0;
}
```

■ C:\Users\alens\OneDrive\Desktop\Suli\4.fÚlÚv\OS\Gyak\5gyak\rendszerhivasok\bin\Debug\rendszerhivasok.exe
Rendszerhivasok tesztelese.Billentyu lenyomasig itt maradunk.Press any key to continue . . .
Megtortent a bill lenyomasa.'random' is not recognized as an internal or external command,
operable program or batch file.
A random parancs nem lesz ervenyes.Press any key to continue . . . ■

```
C:\Users\alens\OneDrive\Desktop\Suli\4.fÚIÚv\OS\Gyak\5gyak\rendszerhivasok\bin\Debug\rendszerhivasok.exe
Letisztitottuk a feluletet.
Process returned 0 (0x0) execution time : 70.520 s
Press any key to continue.
```

2.Feladat Unix parancsok:

```
main.c X
                #include <stdio.h>
         1
         2
                #include <stdlib.h>
         3
                int main (void)
         4
         5
              \square
         6
                      char read[100];
         7
                      printf("Kerem a parancsot!\n");
         8
                      scanf("%s", read);
         9
       10
                            system (read);
       11
       12
                      return 0;
                }
       13
       14
C:\Users\alens\OneDrive\Desktop\Suli\4.fÚIÚv\OS\Gyak\0220\mx6wIrfel2\bin\Debug\mx6wIrfel2.exe
Kerem a parancsot!
date
The current date is: 2022. 03. 07.

■ C:\Users\alens\OneDrive\Desktop\Suli\4.fÚIÚv\OS\Gyak\0220\mx6wIrfel2\bin\Debug\mx6wIrfel2.exe
Kerem a parancsot!
who
'who' is not recognized as an internal or external command,
operable program or batch file.
```

3. Feladat parent és child programok:

Process returned 0 (0x0)

Press any key to continue.

```
main.c X
     1
           #include <stdio.h>
     2
           #include <stdlib.h>
     3
     4
           int main()
     5
     6
               for(int i = 0; i < 10; i++){
     7
                    printf("Szabo Alen mx6wlr\n");
     8
     9
               return 0;
    10
           }
    11
```

execution time : 2.377 s

4.Feladat fork() használata:

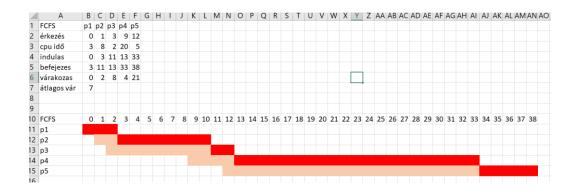

```
#define MAX COUNT 200
 void ChildProcess(void);
 void ParentProcess(void);
void main(void)
∃ {
     pid t pid;
     pid = fork();
      if (pid == 0)
           ChildProcess();
      else
           ParentProcess();
L}
void ChildProcess(void)
∃ {
      int i;
      for (i = 1; i <= MAX COUNT; i++)</pre>
           printf(" Child bol = dn, i);
      printf(" *** A Child processz kesz***\n");
void ParentProcess(void)
int i;
      for (i = 1; i <= MAX COUNT; i++)</pre>
           printf("A Parent tol= %d\n", i);
      printf("*** A Parent kesz ***\n");
}
```

5.feladat fork() befejezési állapotok vizsgálata:

```
#include <stdio.h>
  #include <stdlib.h>
  #include <unistd.h>
  int main()
 ₽ {
      int pid, pidl, pid2;
      pid = fork();
     if (pid == 0) {
          sleep(3);
          printf("child[1] --> pid = %d and ppid = %d\n",
              getpid(), getppid());
      }
      else {
          pidl = fork();
          if (pidl == 0) {
              sleep(2);
               printf("child[2] --> pid = %d and ppid = %d\n",
                  getpid(), getppid());
          }
           else {
               pid2 = fork();
               if (pid2 == 0) {
                   printf("child[3] \longrightarrow pid = %d and ppid = %d\n";
                      getpid(), getppid());
               else {
                  sleep(3);
                  printf("parent --> pid = %d\n", getpid());
          }
      return 0;
```
